Application Development - Munich

According to Gartner Inc., Augmented Reality is one of the Top 10 strategic IT technologies of our time. And Juniper Research forecasts a $1.5 billion revenue stream by 2015. But AR is even more than that. We are at the dawn of a new era. The virtual and the real world are becoming one. With Augmented Reality technology we can access, understand and enjoy digital data, exactly where we expect it to be and tailor it to our liking. AR is the user interface of the future.

With more than 10 years of experience, 500+ projects, more than 450 business customers, an international partner network, numerous federal, national and international research projects and a comprehensive, patented product portfolio, metaio is a pioneer and leader in this game changing technology field. Based on the Unifeye platforms we connect any object to additional, digital information. Our vision is the seamless and easy integration of the virtual into the real world.

metaio is a self-funded and fast growing technology company. Founded in 2003, we currently employ more than 75 team members in two different locations. The company is headquartered in Munich (Germany) with a subsidiary in San Francisco (U.S.A).

For our Munich operations, we are seeking an employee in the field of application development to support our projects and services team.

Task profile:

- Working on customer projects, mainly in the field of mobile applications (iOS, Android)
    - Requirements analysis / engineering
    - Design, user experience, application story book
    - Implementation
- Collaboration with the core development, research and product development
- Improving the internal development process
- Customer and service orientation

Qualifications:

- Qualifying degree (e.g. as “Fachinformatiker, Anwendungsentwicklung” or Bachelor of Computer Science or similar) or sufficient experience and knowledge in the software development domain
- Very good programming skills, mainly in C++, Objective-C, Java
- Experience in (mobile) application development and/or user interface design would be very much appreciated
- Profound knowledge of object oriented software engineering and development (UML, design patterns, etc.)
- Experience in the implementation of software projects and delivery of exciting applications to the end-user
- Strong English language skills
- Creative and analytic abilities
- High motivation and personal engagement
- High flexibility, reliability and team spirit
